

The Blue Egg PE Home Learning

Can you play fairly and keep the score?

Time to Learn:

- Each player places a marker down on the edge of a space known as their nest.
- In the centre of the space place objects. All blue items are worth two points. Everything else is worth one point.
- Players collect one object from the middle and then return it to their nest.
- Players should keep going until there are no more objects left.
- The winner is the player with the most points at the end of the game.

Playing on your own, how many points can you score in one minute? Can you beat your score each time?

Play for one minute against someone else. Who can score the most points in this time?

Play against different family members. Keep track of who scores the most points.

Top Tips

Work Hard

- The faster you move, working hard to keep going, the more points you will score.

Let's Reflect

Explain your tactics. Did you try and get all the blue objects first?

If you did not win what would you change for next time?
