#ThisIsPE
Leadership — Adapting a game using space
SECONDARY KEY STAGE 4 PE // STUDENT LEADERSHIP

Content outline
This activity aims to develop leadership skills to plan and deliver a competitive game, whilst adapting space
- Communication
- Problem solving
- Inclusive

**S**
Space
- Increase the size of the space you are working in (to make the activity easier)
- Decrease the size of the space you are working in (to make the task more difficult)
- Use items or ‘landmarks’ to identify your playing area

**T**
Task
- Use goals or targets to create a scoring system
- Adjust the size of goals / targets to change the difficulty of the task
- Add in additional challenges (eg. Throwing to the goal/target with one hand)
- Add / remove rules to change activity
- Add a time limit to increase pressure / competition

**E**
Equipment
- Use different household items (Eg. cushion, small soft toy, items of clothing) to use within your activity
- Change the size of the items – smaller items are harder to collect, heavier items may be used for older participants – try using a ball of socks as a ball
- What other household items can you creatively use within your activity?

**P**
People
- If you have another person in your house, ask them to compete against you
- Challenge a friend to complete your activity in their household
- How can you adapt this activity for more people to take part?

Learning intention
**Physical:**
- To develop knowledge of how adapting space can affect an activity / game

**Personal:**
- Inclusion and Equality

Learning questions:
- How could you adapt your idea for being indoors?
- What might you do if someone is not physically able to run at a high speed?
- If outside and the ground is wet, what H&S measures might you include?
- Which use of space worked the best? And why?
- Create your own version of this activity and lead it to everyone in your household - then get their feedback; how would you improve the activity you delivered?
