Learning intention

**Physical:**
- To strike an object with equipment, and to make the object move

**Personal:**
- Working with others

Verbal Instruction / Feedback:
- Give each task specific feedback; “Really good hit”
- Praise individual tasks; “Great shot”
- Use clear language when giving instructions – use single words where possible; “hit”, “move your arm”, “hit to me”

**Space**
- Increase the distance away from the item so that the young person must reach to hit it
- Lack of contact to the item will make the task more difficult
- Decrease the distance away from the item to make the activities easier

**Equipment**
- Change the items being used to develop the same skill in different contexts
- Use different household items to use as a bat (Eg. Large wooden spoon or spatula)
- The size and weight of the object can be changed to adapt the difficulty of the task – smaller items are more difficult to hit
- Use a hair bobble or scarf to fasten/secure the bat

**Task**
- Challenge the young person to reach higher to strike an item
- Challenge the young person to reach further to strike an item
- Create objects for the young person to ‘knock-down’
- Use clear and simple language within instructions – try to use single words where possible

**People**
- Introduce another person at the side of, or across the table for the young person to hit towards
